

## CESSWI

■ The Certified Erosion, Sediment and Storm Water Inspector™ Certification Program (CESSWI™) was created by EnviroCert International, Inc. in conjunction with an international oversight committee of erosion and sediment control, and storm water management professionals.

## Knowledge and Skills

■ CESSWI Registrants must understand the minimum requirements for the US EPA National Pollutant Discharge Elimination System (NPDES) storm water permit program and/or Canada’s Department of Fisheries and Oceans Requirements. Registrants must demonstrate proficiencies in Site Safety, Communication, Documentation, Inspector Duties, and Plan Management. Additionally, registrants must possess a full understanding of the following aspects of Best Management Practices (BMPs): Purpose, Objective, Targeted Pollutants, Applications, Limitations, Implementation Considerations, Inspection Criteria, and Maintenance.

## Program Requirements

■ Candidates must have at least three years of directly related experience and possess a high school diploma (or equivalent) along with work references. Individuals having at least one year of directly related experience AND at least 16 hours of related training may qualify for In-Training status.

Detailed information about program requirements and procedures can be found at the CESSWI web site:

[www.cesswi.org](http://www.cesswi.org)

## Certification Programs

■ EnviroCert International, Inc. is recognized internationally as a certification body for professionals in the erosion and sediment control, and storm water quality industries. With over 25 years of certification experience, EnviroCert International, Inc. takes pride in our certification programs.

- CPESC® - Certified Professional in Erosion and Sediment Control™
- CPSWQ® - Certified Professional in Storm Water Quality™
- CESSWI™ - Certified Erosion, Sediment and Storm Water Inspector™
- CMS4S™ - Certified MS4 Specialist™

## Benefits of Certification

- Demonstrates proficiency in the erosion and sediment control field
- Enhances your technical and professional credibility
- Satisfies the qualified-person requirement in some local and state programs
- Increases personal value, recognition, and marketability
- Encourages greater commitment and personal career growth

## CPESC

■ The Certified Professional in Erosion and Sediment Control program was created over 25 years ago to provide professional credentials to individuals working on construction-site erosion and sediment control issues. This program has active registrants in over 15 countries around the world. CPESC certification is required by numerous local, state, and provincial governments, and is recognized in several state Construction General Permits.

## Knowledge and Skills

■ CPESC Registrants must understand the minimum requirements for the US EPA National Pollutant Discharge Elimination System (NPDES) permit program and/or Canada's Department of Fisheries and Oceans Requirements, as it relates to construction-site Erosion and Sediment Control. Registrants must demonstrate proficiencies in Site Planning and Management, Erosion Prediction, Runoff Management, Soil Stabilization, Erosion Control, and Sediment Control.

## Program Requirements

■ Candidates must have at least seven (7) years of directly related experience and possess a high school diploma (or equivalent) along with work references. Individuals having a degree may receive up to four (4) years credit for their education. Individuals having at least two (2) years of qualifying education and/or work experience may qualify for In-Training status.

Detailed information about program requirements and procedures can be found at the CPESC program web site:  
[www.cpesec.org](http://www.cpesec.org)

## CPSWQ

■ The Certified Professional in Storm Water Quality program was created over 10 years ago to provide professional credentials to individuals working with storm water issues. Individuals holding the CPSWQ certification have the knowledge and abilities to help projects meet federal, state and local NPDES storm water requirements. CPSWQ certification is accepted by some local, state and federal governments.

## Knowledge and Skills

■ CPSWQ Registrants must understand the minimum requirements for the US EPA National Pollutant Discharge Elimination System (NPDES) permit program and/or Canada's Department of Fisheries and Oceans Requirements, as related to storm water quality. Registrants must demonstrate proficiencies in Pollutants in Storm Water Runoff, Watershed Hydrology, Quantifying Pollutants in Storm Water, and BMPs for Urbanizing Areas.

## Program Requirements

■ Candidates must have at least seven (7) years of directly related experience and possess a high school diploma (or equivalent) along with work references. Individuals having a degree may receive credit for their education.

Detailed information about program requirements and procedures can be found at the CPSWQ program web site:  
[www.cpswq.org](http://www.cpswq.org)

## CMS4S

■ The Certified Municipal Separate Storm Sewer System Specialist™ Certification Program (CMS4S™) was created by EnviroCert International, Inc. in conjunction with an international oversight committee of MS4 operators and stormwater professionals.

## Knowledge and Skills

■ CMS4S registrants must understand the minimum requirements for the US EPA National Pollutant Discharge Elimination System (NPDES) stormwater permit requirements, as it relates to overall coordination and implementation of the MS4 operations. Registrants must document proficiencies in each of the NPDES Minimum Control Measures: Public Education and Outreach; Public Participation and Involvement; Illicit Discharge Detection and Elimination; Construction Site Runoff Control; Post-Construction Runoff Control; Pollution Prevention and Good Housekeeping Practices as well as overall Program Management & Documentation, Program Funding, and Program Audits & Evaluation.

## Program Requirements

■ Candidates must have at least 5 years of directly related experience and possess a high school diploma (or equivalent) along with work references.

Detailed information about program requirements and procedures can be found at the CMS4S program web site:
